

Help us provide urgent relief to India!

Right now, India is facing one of the largest humanitarian crises of our time. In response to this emergent situation, we have established the **Pratham Covid Relief Fund** to support immediate and long-term recovery efforts.

Presently, we are cooperating with multiple partners to mobilize essential supplies and services for communities being ravaged by the second wave of the pandemic.

Specifically, our plan includes:

- **Securing and delivering oxygen concentrators as well as rapid tests, vaccines, and personal protective equipment (PPE) to Indian hospitals and care centers.**
- **Exploring the conversion of Pratham vocational training centers and district offices into alternate facilities for Covid treatment.**
- **Coordinating field response teams to aid in the distribution of supplies and ensuring relevant and timely dissemination of accurate information in regional languages.**

We have temporarily paused our regular activities and are currently coordinating urgent relief and developing sustainable strategies to help Pratham communities build back effectively. The recovery will undoubtedly take time and require substantial planning and coordination.

As one of India's leading education NGOs, with operations in 21 states and 10,000 communities, Pratham has a history of mobilizing resources and people effectively all across India.
